

I-95/SCUDDER FALLS BRIDGE IMPROVEMENT PROJECT

LEVEL OF SERVICE

What is Level of Service (LOS) for a Typical Freeway Segment?

LOS	Definition	Typ. Illustration
A	Represents a free-flow operation. Vehicles are almost completely unimpeded in their ability to maneuver within the traffic stream.	
B	Represents reasonably free-flow operation. The ability to maneuver within the traffic stream is slightly restricted.	
C	Represents a traffic flow with speeds near or at free-flow speed of the freeway. Ability to maneuver within the traffic stream is noticeably restricted.	
D	Represents speeds that begin to decline with increased density. Ability to maneuver within the traffic stream is noticeably limited.	
E	Represents operation at its capacity. Vehicles are closely spaced within the traffic stream and there are virtually no useable gaps to maneuver.	
F	Represents a breakdown of vehicle flow. This condition exists within queues forming behind the breakdown points.
