

# I-95/SCUDDER FALLS BRIDGE IMPROVEMENT PROJECT

## LEVEL OF SERVICE

### What is Level of Service (LOS) for a Typical Freeway Segment?

LOS	Definition	Typ. Illustration
<b>A</b>	Represents a free-flow operation. Vehicles are almost completely unimpeded in their ability to maneuver within the traffic stream.	
<b>B</b>	Represents reasonably free-flow operation. The ability to maneuver within the traffic stream is slightly restricted.	
<b>C</b>	Represents a traffic flow with speeds near or at free-flow speed of the freeway. Ability to maneuver within the traffic stream is noticeably restricted.	
<b>D</b>	Represents speeds that begin to decline with increased density. Ability to maneuver within the traffic stream is noticeably limited.	
<b>E</b>	Represents operation at its capacity. Vehicles are closely spaced within the traffic stream and there are virtually no useable gaps to maneuver.	
<b>F</b>	Represents a breakdown of vehicle flow. This condition exists within queues forming behind the breakdown points.
